## The Best Built Vans in the Industry

# Accubuilt by Vartanian

The Only Wheelchair Vans  
that Look, Run and Ride like OEM.

We are more than fasteners and assemblers. We are automotive engineers and skilled craftspeople with a reputation for quality and innovation that has led our industry for more than 125 years.

Our twelve-person engineering team is devoted to developing, testing and implementing the best materials, processes and procedures needed to ensure consistent, reliable quality. Our 200+ member workforce averages over 17 years of experience and many represent the third generation of their families who have worked for our company.

Our 175,000 square-foot manufacturing facility, with state-of-the-art tooling, lets us do what our competitors can't—design, mold, stamp and fabricate doors, floors, roll cages and many other custom parts that go into each Accubuilt vehicle.

When the name says Accubuilt, you're getting more than a conversion. You're getting an automotive transformation with a level of quality and many exclusive features you won't find anywhere else. When the name says Accubuilt, you're getting what you expect from the world's leading manufacturer of specialty vehicles: The Best Built Vans in the Industry.

#### **An Open and Shut Case**

As soon as you open our stamped-steel raised doors, side or rear, you'll see proof that Accubuilt is built tighter and stronger with a higher quality fit and finish than any competitor.

18-inch raised roof

24-inch raised roof

32-inch raised roof

# Take a good, close look – inside and out.

You won't even think of buying anything else!

## Accubuilt Advantage

Our one-piece molded fiberglass raised roofs feature an integrated reverse flange design. This innovation provides a much more attractive attachment to the van as well as a vastly superior water seal. Reverse flange means the roof forms a continuous overlapping joining seal with the van from the inside. No need for separate trim to cover screws that would be required to connect the top to the van. You get a tight, solid fit on the inside and a clean, smooth appearance on the outside. There are no seams to leak, and no exterior screws to loosen and squeak causing problems down the road.

## Nationwide Coverage:

We serve buyers in all 50 states, customizing vans to meet all D.O.T. requirements.

## Accubuilt Exclusive

Accubuilt interiors feature seamless ABS headliners, sidewalls and door panels. ABS means the surface is impervious to fluids, highly resistant to mars and scratches and easier to clean.

## Accubuilt Exclusive

Made from heavy-gauge tubular steel, the Accubuilt rollcage utilizes race car technology to provide superior passenger protection. This design is far stronger than conventional roll cages, especially at the cross sections. It not only makes our vans safer but also provides additional strength and rigidity that makes the whole vehicle ride smoother and quieter. Note that the wheelchair shoulder belt attachments are integrated into our roll cage and meet all FMVSS standards.

## Accubuilt Exclusive

Our one-piece ABS headliner features recessed lighting for better visibility and full HVAC venting for improved airflow. And to further assure passenger comfort, we offer a separate 22,000- to 28,000-BTU HVAC system for the rear of our vans to work in coordination with the factory-installed front unit.

## Accubuilt Exclusive

Our state of the art painting facility lets us match OEM quality specifications. We take great pride in painting each van to match the exact color scheme and imagery you want including your name, logo and other information.

## Accubuilt Exclusive

You're looking at the only raised doors that look and fit like OEM. That's because we custom design and die stamp our door extensions as one piece from heavy-gauge, electro-galvanized steel. Then we precision weld these extensions to the original doors so they don't flex, don't crack and look like they were originally made for our vans. Nobody else can build a door like ours. Our investment of millions of dollars for tooling and machinery assures you that our doors will operate for the life of the van.

## Quality. Comfort. Style.

Our seats are custom made by an industry leader, and meet all FMVSS standards. Choose fabric, vinyl or leather in a variety of colors and configurations: Stationary bench seats of one to four persons; aisle or side-facing jump seats of one to three-person capacity; or forward-facing jump seats of one to two-person capacity.

## Step Up to the Best Floors

Choose our ultra-premium Altro walkway vinyl floor covering over a 1/2- or 3/4-inch plywood sub floor. This grade of vinyl is not only attractive, it is highly resistant to sliding and slipping; and it is so durable it can outlast the life of the van. Equally important, we install our available Altro flooring and seal it to the sidewalls. This technique forms a hermetic seal so no dirt or fluids can leak through to cause odor or rot. Other quality flooring options are available, including 3/16-inch RCA ribbed rubber transit and Loncoin vinyl floors.

## Choice of Lifts

Choose Ricon or Braun wheelchair lifts that meet FMVSS, ADA and VA specifications for side or rear door access.

## Custom Accessories are Available

A wide variety of non-emergency transportation items can be supplied to meet your specific needs. These items include stretchers and mounts for those situations when a passenger must be transported in a prone position. All stretcher mounts have a quick release, adding versatility to your van. Other non-emergency accessories, including oxygen bottle holders, stairchair/wheelchair storage racks, as well as exterior lighting fixtures, are available upon request.

Privacy tinting is available for windows.

# Special Options

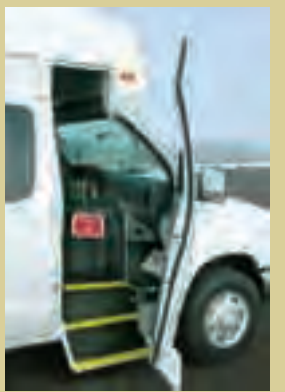

Custom fabricated running boards are available in full or half lengths with solid-plate or extruded steel mesh.

Ambulance style door holding brackets on wheelchair access doors.

Storage rack secures wheelchair when not in use.

Our step wells are custom designed to assure easy entry and exit. Steel step plates are used with consistent height and depth on the risers. The step plates are also wide and deep enough to support the whole foot.

# Build your shuttle business with Accubuilt.

Want to make your assisted living and other clients feel special by transporting them in style and luxury? Want to give busy corporate executives a fully functioning, rolling boardroom where they can work while traveling down the interstate?

Just describe the kind of seating, amenities and features you want. Accubuilt will work with you to design and build a van that will build your business by attracting more customers and keep them coming back. Whatever your special need, we have a floor plan, equipment and components to match it.

Available entertainment centers offer the latest in media technology. Remote control televisions along with VCR/DVD players and upgraded sound systems offer your passengers the environment that makes them feel right at home. Optional LCD flat screen models are available.

Storage compartments behind the rear seats provide ample space for luggage and bulky items like golf bags or coolers.

When you buy a van, insist on quality you can't see, like our roll cage, for example, built with heavy-gauge tubular steel to provide superior rollover protection.

One-piece molded fiberglass raised roof looks better on the outside and seals tighter on the inside thanks to a reverse flange design that eliminates the need for exterior screws and trim.

Custom coordinated luxury leather-trimmed, cloth, or vinyl seats are available in all Accubuilt shuttle vans for eight to fifteen passengers. All seats and floor plans meet FMVSS standards including retractable seat belts.

Choose from a variety of steps and running boards that are highly functional and visually appealing. These include covered single step wells; mesh or solid-plate which are available in half or full length. Also available are custom molded fiberglass running boards with fender flares that add an attractive aerodynamic look to the vehicle.

## The Best Built Vans in the Industry are also the Best Backed.

Did you know that Accubuilt is the leading Ford FTQP and NMEDA-QAP Certified Converter? Did you know that we are the oldest and largest Cadillac Master Coachbuilder?

This means Accubuilt has the know how, manufacturing and financial resources required to build your vans strong and tight, with the fit, finish and styling grace of a luxury vehicle. It also means you can rely on us to deliver your vans on time and back them with the best parts, service and warranty programs in the industry.

Nobody can complete your order faster than Accubuilt. As a major Ford coachbuilder, we stock a large inventory of Ford chassis including a wide selection of powertrain options in both standard and extended wheelbases. Plus, we typically maintain a large selection of vehicles already converted and ready to ship.

To keep your vans up and running and your income flowing, our parts department provides prompt service on all warranty and replacement parts. Orders received prior to 3 p.m. Eastern Time can ship out the same day.

At Accubuilt, we are committed to total customer satisfaction. Our dedication to quality doesn't stop when your van is shipped. It's only the beginning.
