

PRIMETIME™

350 Series

*Primetime shown with optional chrome wheel covers

Step up to a Better Value

The PRIMETIME, with its narrow body and dual rear wheels gives you a quality-built steel-safe people mover that is safer than a 15-passenger van at a price that makes good business sense.

Glaval's quality fit and finish, white galvanized steel skin walls, "steel-cage" construction surrounding passenger compartments with ribs of steel, undercoating and foamed-in insulation make the PRIMETIME durable enough to withstand years of tough street conditions, yet quiet and comfortable enough to keep your passengers happy. The result is a vehicle that compliments the reputation and image of its owner and operator.

Glaval Bus prides itself on being a long time participant in providing paratransit transportation. When ADA equipment is required, a versatile range of wheelchair lifts, tie-down restraints and options are available.

Flexible luggage storage options, electronic packages, such as TV and monitors, A/C choices and heaters, plus a wide selection of interior designs and seating choices ensure your patrons travel in solid, quiet comfort. All with no CDL required.

"Steel-Safe" construction wraps passengers in strength and comfort. The subfloor of welded square tube steel is covered with 5/8" pressure-treated MarineTech plywood. A welded steel cage frame is filled with solid-block dense foam insulation and laminated to a galvanized steel exterior skin and an interior wall of vinyl-covered luan for the side and rear walls that give you the durability and strength you need. Glaval buses have a 5 year/100,000 mile limited warranty.
